

Yulimar Duque de Alba

REACT NATIVE DEVELOPER

Medellín, Colombia | LinkedIn: [linkedin.com/in/laduquesadev](https://www.linkedin.com/in/laduquesadev)
Github: github.com/LaDuquesaDev

React Native Developer with 4+ years of experience building and shipping mobile applications from zero to production. I've owned the full development lifecycle — from architecture decisions and feature development to App Store Connect management, EAS Build configuration, TestFlight distribution, and successful releases on both the App Store and Google Play. I work with React Native, Expo, TypeScript, and modern tooling to deliver clean, performant UIs and scalable codebases. I bring both technical depth and product thinking to every project I join.

TECHNICAL SKILLS

- **Core Mobile:** React Native, Expo SDK, TypeScript, expo-router, EAS Build, Zustand, TanStack, Query, Axios, react-native-iap, i18next.
- **Languages & Frameworks:** JavaScript, TypeScript, React, Next.js, Astro.
- **State & Architecture:** Redux, Zustand, Context API, REST APIs, Component-Based Arch.
- **Tools & Cloud:** App Store Connect, Google Play Console, TestFlight, EAS Submit, Claude Code.

WORK EXPERIENCE

React Native Developer

Papora | June 2025 – Present | Remote

- Built the Papora mobile app from scratch using React Native 0.81, Expo SDK 54, and TypeScript (strict mode), taking it from zero to successful production launches on both the App Store and Google Play.
- Owned the full App Store Connect and Google Play Console workflows: provisioning profiles, build submissions via EAS Build, TestFlight distribution, and release management.
- Navigated Apple's review process end-to-end — handled guideline compliance, responded to rejections, and managed post-launch updates and hotfixes.
- Defined the app's architecture: expo-router for navigation, Zustand for global state, TanStack Query for server state, and Axios for HTTP — all with scalability in mind.
- Integrated react-native-iap to handle iOS In-App Purchases, including subscription flows and receipt validation.
- Implemented full internationalization (i18n) with i18next and react-i18next, supporting multiple languages from day one.
- Collaborated with cross-functional teams to define and ship core features, maintaining code quality through reviews and internal documentation.
- Used Claude Code and its AI-assisted development tools to accelerate project scaffolding, code generation, and technical decision-making.

Frontend Developer

Ruedata | Sept 2022 – Jan 2025 | Remote

- Collaborated with the mobile lead to build a React Native application from scratch, taking it to production in 9 months.
- Delivered features that reduced average load time by 1.8 seconds and improved overall app responsiveness.
- Refactored critical components, leading to a 35% reduction in production bugs.
- Integrated RESTful APIs and managed state using Redux and Context API.
- Used Firebase to enable and store in-app notifications.
- Participated in code reviews and contributed to internal process improvements.

Freelance Web Developer

Self-Employed | Jan 2021 - Aug 2022 | Remote

- Developed 6+ custom websites for clients in tourism, healthcare, and education using React, JavaScript (ES6+), and modern frontend practices.
- Managed client relationships end-to-end: requirements gathering, solution proposals, and on-time delivery.

EDUCATION

Bootcamp in Frontend Web Development

Laboratoria | January 2022 - June 2022

Higher University Technician in Computer Science

Instituto Universitario de Tecnología y Administración - IUTA, Venezuela | January 2008 - September 2011

English Level: B2 Intermediate.
